ne where, if anywhere, the tangent line to $f(x)=x^3-5x^2+x$ is parallel to the line $y=$

$$f'(x)=3x^2-10x+1$$

$$3x^2-10x+1=4$$

$$3x^2-10x-3=0$$

$$x=\frac{5}{3}\pm\frac{\sqrt{34}}{3}=\frac{5\pm\sqrt{34}}{3}$$
